

LO evolution from $\mu_0 = 1$ GeV to $\mu = 10$ GeV

$$\int_0^1 dx x^{2n} F_u^-(x, \xi, \mu)$$

- $n = 0$ --- Fit with $f(\xi) = A_0$
- $n = 1$ --- Fit with $f(\xi) = A_0 + A_1 \xi^2$
